Fabrication et Composition de nos Savons (solides)

Nos Savons sont fabriqués par saponification à froid ou au chaudron (copeaux) selon la recette ancestrale.

Pour la base de la pâte à savon, nous sélectionnons des **huiles végétales vierges pures olive et coco** (sans huile de palme) afin d'obtenir une base savon végétale à 77% de matières grasses (Ancien Savon de Marseille 72%) soit un savon **surgras** très doux et bon pour tous types de peau.

Afin d'améliorer et d'obtenir un savon de très haute qualité, nous lui incorporons notre bienfaiteur **beurre de Karité bio**.

La coloration est obtenue par des oxydes c'est-à-dire des ocres, pigments minéraux ou argiles. Nos parfums sont souvent composés à partir d'huiles essentielles et exclusivement originaires de Grasse – Les huiles essentielles sont de qualité 100% pures et naturelles.

Nos savons sont sans conservateur.

Pour les savons au lait d'Anesse, il est **Bio** et issu de l'élevage de Mr Vallet ou Mr Maleig.
